Talk to EVERYONE About Roth Conversions

As I speak with advisors across the country, I continue to see a major opportunity being missed: meaningful conversations about Roth conversions—especially with clients over age 65. Too often, I hear the same reasoning—they believe there simply isn't enough time for these clients to recover from the upfront tax cost. In my view, that assumption is not only incomplete, it's costing your clients significant long-term value. And they are missing a lot of annuity sales—because specific index annuities are perfect for Roth conversions. More about this in a moment.

When I look at retirement income plans, the real issue isn't just today's tax bill—it's the future impact of Required Minimum Distributions. Large IRA balances inevitably lead to larger RMDs, which can push clients into higher tax brackets later in life. But even more overlooked is the IRMAA effect. Higher taxable income from RMDs can trigger substantial increases in Medicare Part B and Part D premiums. These surcharges quietly drain retirement income year after year, and I find that many clients have never even been shown this risk.

What I want you to consider is this: a well-structured Roth conversion strategy can help smooth out those future income spikes. By converting in a controlled way, clients reduce future RMDs, better manage tax brackets, and potentially avoid or minimize IRMAA altogether.

And then there's the legacy component—something I rarely see addressed. When a client dies, their heirs must drain inherited IRAs within 10 years, often during their highest earning years. That creates a significant tax burden. A Roth IRA, on the other hand, transfers tax-free—an enormous advantage that many clients would prioritize if they understood it clearly.

This is exactly why we built our TWH Roth conversion service. We'll run the analysis for you—no software to learn—and provide clear, real-world illustrations of tax savings, IRMAA impact, and legacy outcomes. My call to action is simple: let us help you bring these conversations to life with actual numbers your clients can trust.

The Perfect Roth Conversion Annuity

There are a few index annuities built specifically to help clients do partial Roth conversions over 3 to 10 years, but only one stands out as the absolute best. It has a 10 year surrender, 7% commission to age 74, has GREAT crediting rates (up to 9.5% S&P cap), from an 'A' rated carrier, and charges no penalties or chargebacks for partial Roth conversions into a mirror-policy that is created to receive the Roth funds—all done with a single annuity application!

Key Points:

1. The carrier does not create a new annuity contract with each annual conversion. One policy—split into two mirror accounts: An IRA, and a Roth IRA.
2. High index crediting rates! Other annuities that try to do Roth conversions have such low crediting rates that clients end up with very little growth. Some have up-front bonuses, but that only helps once. High crediting rates help every year.

Bottom line: You will 100% grow your annuity sales by talking to people about the power of Roth conversions.

Let us show you how simple and amazing this is.
800-200-9194 or **info@twhagency.com**.

Perfectly Balanced Retirement Tool

Below is an example of how the PBR tool can show clients how to balance risk and safety assets in the right ratio (60/40 in this case), with 60% in 'Safety Growth' (Index Annuities) and 40% in 'Risky Growth'. The growth rates for both sides come from real historical economic performance, so there is no assumption or misrepresentation of performance on either the Risky or Safe side.

Once the proper balance is reached, strategic income withdrawals are taken from one side or the other each year (shown in red), with a 3% inflation increase each year. Which side the withdrawal is taken from is determined by how the market performs each year.

Perfectly Balanced Retirement						40%	(Must be at least 10%)				60%		
(Using Historical Economic Performance)						**Risky Growth**					**Safety Growth**		
						(Index ETFs)					**(Index Annuities)**		
Investable Assets					Portfolio	$159,200				Portfolio	$238,800

Donna $1,650/mo	$ 19,800			2020	12.77%	$125,199	$ 17,622		2020	9.48%	$509,093	$ -	
Combined:	$ 45,000			Avg:	4.62%		$106,588	Withdrawals	Avg:	7.90%		$98,448	Withdrawals
+ Withdrawals:	$ 12,000						Total Withdrawals:	**$205,036**					
Total Income:	**$ 57,000**	or...		**$ 4,750**	**/month**		Total Inestable Assets Remaining:	**$634,292**	$236,292	Black=more than you started with.			
										Red=means less than you started with.			

The outcome:

1. By balancing assets between Risky and Safety assets, large losses are avoided, and more assets are protected.
   a. This also reduces volatility because index annuities do not swing up and down with the markets.
2. By creating a smart withdrawal strategy, the Risky assets are not reduced further in years when the market is down, thus reducing the impact to the balance on the Risky side.
   a. This strategy creates approximately $300,000 more in assets compared to a non-balanced plan using only a Risky account, with no alternative accounts from which to take income withdrawals.

If you would like to see how real numbers would look for any of your clients, please call or email and we can create a customized plan for as many people as you like. Call Greg on 714-283-9196 (direct line).

The TWH 2026 *Elite Producers Club* Marketing Allowance Plan

- ➢ Five levels of cash bonus!
- ➢ Bonuses paid monthly!
- ➢ Up to $6,250 extra cash!

***Five** levels of increased compensation to help you with your marketing costs. Whether it's to fund a lead program or upgrade your technology, this plan will help you build a more successful business!*

Level	Requirements	Earned Bonus	Cumulative Earned Bonus
I	$250,000 of annuity premium	$250	$250
II	$500,000 of annuity premium	$500	$750
III	$1,000,000 of annuity premium	$1,000	$1,750
IV	$2,000,000 of annuity premium	$1,500	$3,250
V	$3,000,000 of annuity premium	$3,000	$6,250
*	Additional Custom Rewards	Tailored to Each Adviser's Wants & Needs	

- **Rules:**
- This plan is not available for any agents receiving any other type of marketing, lead, seminar, or client prospecting programs.
- TWH Agency reserves the right to modify or terminate this plan at any time.
  All final decisions are at the discretion of TWH Agency.
- This plan is for paid business only, from 01/01/2026 through 12/31/2026.
- All payouts and awards will be paid monthly.
- One bonus level per producer.
- All Annuity and Single Premium Life Insurance business with terms of 7 years or more earn 100% Premium Credits. Premium Credits will be reduced for older age cases by the amount of commission reduction. Plans with less than 7-year duration, MYG annuities and immediate annuities will be credited at 50%.
- Qualification for initial membership will be $250,000 of qualified premium.

Contracting Tips…

for Error-Free Application Processing

The following are all items that can prevent your client application from being processed:

- Contracting – Contact us to submit your contracting **BEFORE** taking an application
- Carrier Specific Training – Most carriers are now requiring you to complete product and suitability training on their websites PRIOR TO solicitation.
- Anti-Money Laundering Training – Most carriers now require this training to be completed annually.
- E&O – Most carriers require E&O, so make sure you keep your certificate up to date.

These items all need to be completed PRIOR TO the date on the client application.

Powering the Future

A Closer Look at Renewal Rate Caps and Spreads

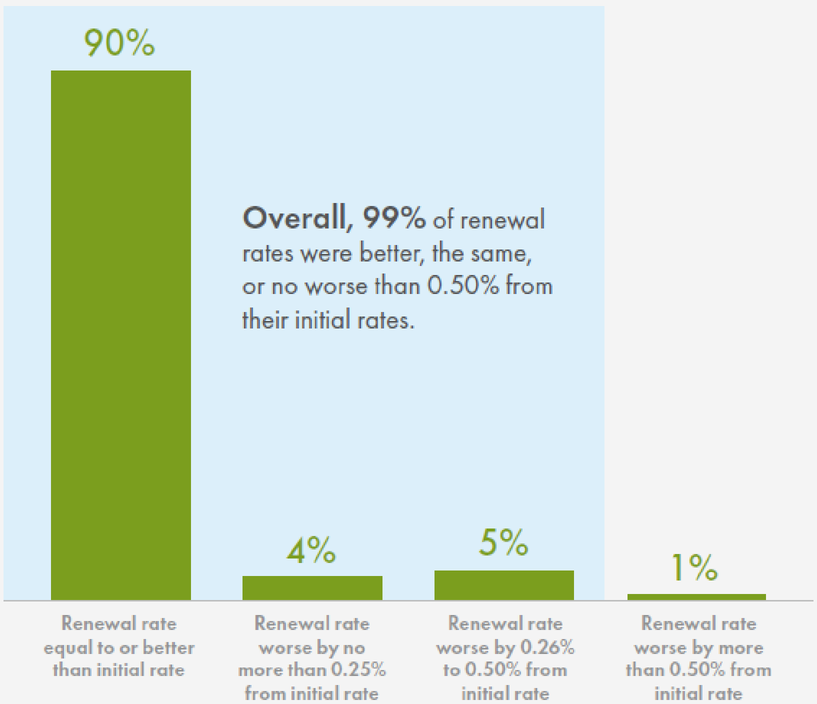
THE POWER SERIES
of Index Annuities®

We know you might have questions about renewal rate caps and spreads on our index annuities. While the rates we set in the future may vary from rates we have historically set, we wanted to provide some background on our renewal rate process.

Many factors go into declaring renewal index rate caps and spreads for your clients' index annuity contracts. Our goal is to set our rates in a manner that is consistent with the initial rate as much as possible, but rates may fluctuate at the end of each crediting term. Factors that cause renewal rates to vary from the initial rate may include (but are not limited to) changes in the interest rate environment and equity market volatility, as well as how long it has been since contract issuance.

The data provided below is designed to help you understand our history as it relates to renewal rate setting. As you can see, the vast majority of contract renewals (99%) have experienced renewals that were the same, better, or no more than 0.50% worse as compared to their initial rate. The following chart offers a detailed look at our renewal rate history.

Renewal Rate History for The Power Series of Index Annuities



Note: Renewal rate history is not predictive of future results.

Data/experience is based on 589,677 renewal crediting rate declarations for index annuity contracts issued by American General Life Insurance Company and The Variable Annuity Life Insurance Company as of 6/30/19. Please note that participation rate and monthly index interest accounts are not included in this analysis due to their different rate levels/structures as compared to index rate caps and spreads.

See reverse side for more information.

What's the most powerful crediting method?

Annual Point-to-Point? Monthly? Global Index?

Do you know how to advise your clients when helping them select crediting methods? Should you only select one? Should you use the fixed interest allocation? How much should go in each "bucket"? These are all questions that depend on your client's needs and personality. We can help.
